EDITORIAL COMMITTEE

CHARLES J. PIEPER, *Editor*

New York University,
Washington Square East,
New York, N. Y.

CLARENCE M. FRUIT

*Business Manager and Assistant Editor of
Abstracts and New Publications*

College Station,
Stillwater, Oklahoma.

REPRESENTATIVES OF AFFILIATED ASSOCIATIONS

W. L. EIKENBERRY—*Science Association of the Middle States*

E. S. OBOURN—*National Association for Research in Science Teaching*

LOIS M. SHOEMAKER—*National Council on Elementary Science*

VOLUME 25—Numbers 1 to 7

JANUARY—DECEMBER, 1941

SCIENCE EDUCATION, INCORPORATED
525 WEST 120 STREET
NEW YORK CITY

Published
January, February, March, April, October,
November and December, 1941

INDEX TO VOLUME 25

ARTICLES

- Activities in Science?, What Kind of, Samuel P. Unzicker, 42-48
- Adolescent "Interested in Science," The, Herbert S. Zim, 1-6
- Art and Science: A Method, Herbert Bearn, 265-266
- Attitude and the 3 R's, Scientific, Harold H. Punke, 20-24
- Biology, The Readability of Selected Contemporary Books for Leisure Reading in High School, Edward Kessler, 260-264
- Broadcasts and Recordings for the Science Classroom, An Evaluation of, J. Robert Miles, 200-206
- Chemistry, Equilibrium and Hydrolysis: A Unit in Advanced High-School, Mark Neuhof, 279-281
- Club, Beginning the Young Scientists, Eleanor L. O. Heisler, 155-158
- Club Makes a Book, Young Scientists, Eleanor L. O. Heisler, 324-326
- Comprehensive Examinations in Undergraduate Colleges, A Suggested Substitute for, Aravilla M. Taylor, 252-254
- Concepts and Beliefs in Anthropology and Biology of Entering College Freshmen and the Relation of These to General Scholastic Aptitude, Some Significant, Lynn L. Ralya and Lillian R. Ralya, 314-320
- Concepts, The Difficulty Level of Certain Science, Ralph G. Bailey, 84-89
- Conservation Comes to the Elementary Schools, Nellie M. Fields, 121-124
- Conservation Education and the Elementary School, E. Laurence Palmer, 131-134
- Conservation Education in Ohio, Developing the Program of, Ollie E. Fink, 124-130
- Conservation for National Defense, Let's Really Teach, Evelyn F. Knoppel, 342-343
- Content, Elementary Science, Philip B. Sharpe, 147-148
- Content of Health Material in College Chemistry Textbooks, Ralph E. Dunbar, 68-71
- Curricula of Teachers Colleges, Science, Leonard A. Ford, 95-97
- Democratic Way of Life, Desirable Contributions of Science in General Education to the, Symposium, 181-194
- Demonstration as Entertainment, The Chemistry, Harold J. Abrahams, 24-29
- Education for Teachers of Science, An Attempt at Specificity in an In-Service Program of, G. W. Haupt, 142-143
- Elementary School, Effective Teaching of Science in the, Mary Melrose, 138-141
- Elementary School Teachers, The Development of Science Content Courses for the Training of, A. LeRoy Baker, 97-99
- Elementary Science Teacher, The Problems of an, Helen V. Coppersmith, 152-154
- Elementary Science, The Significance of Certain Essentials of Accurate Thinking for, G. W. Haupt, 307-310
- Elementary Teachers in Texas Teacher Training Institutions, Science Education for, Madeline Rudy, 267-273
- General Education in the College Program, Contributions from the Biological Sciences to, Nathan S. Washton, 274-279
- General Science Course to the Development of Scientific Attitudes, Measuring the Contribution of the Ninth Grade, George Wessell, 336-339
- General Science Textbooks on the Basis of Their Contributions to Health Education, An Evaluation of Certain, Jerome R. Hurd, 327-330
- General Science, The Fifty-Five Minute Class Period for, G. M. Rawlins, Jr., 219-221
- Gestalt Psychology and the Teaching of Science, F. Theodore Perkins, 9-13
- Huxley, Great Teachers of Science: I. Thomas Henry, James D. Teller, 239-247
- Junior Colleges of Connecticut, New Jersey, New York and Pennsylvania, A Survey of Science in the, M. A. Lessler, 99-100
- Junior High School Science Courses, A Method of Determining the Value of, G. M. Relyea, 208-209
- Laboratory Facilities and Procedures for Chemistry in the High Schools of North Carolina, William Nathan Reynolds, 89-93
- Life, Teaching the Beginning of New, Beulah L. Baley and W. A. Robinson, 29-34
- Light Needed to Interpret General Life Situations, Principles in the Field of, E. C. Fonsworth, 16-20
- Magazine, The Scientific Articles in a Popular, W. S. DeLoach, 273-274
- Mathematical Knowledge for Science Students, Desirable, James H. Zant, 330-336
- Microprojector as a Teaching Aid, A Study of a, Edith Brechbill, 215-218
- N.A.R.S.T. on Teacher Preparation, Report of Committee of, A. W. Hurd, 247-251
- Nutrition: An Educational Opportunity and Responsibility, Teaching, Joseph Hirsh, 379-386

- Orientation in Natural Science, A Biological Science Unit for, M. Winokur, 61-65
- Physical and Chemical Sciences Needed for Personal Use, The Knowledge of, George Warren Davis, 320-323
- Physical Science for General Education, A Determination of the Relative Importance of Principles of, Harold E. Wise, 371-379
- Physics, Locally Constructed Apparatus for Use in High School, Richard I. Misner, 391-396
- Physics Students with Reference to Previous Training in High-School Physics, A Study of the Grades of the West Virginia University First-Year, James Earl Rudy, 210-213
- Play: The Man with the Telescope, A, Marion H. Stucke, 386-391
- Popularizing Science, Maitland P. Simmons, 93-95
- Principles or Generalities Appearing in Biological Textbooks Used in the Secondary Schools of the United States from 1800 to 1933, An Analysis of, John Irvin Cretzinger, 310-313
- Problem Solving, Classroom Procedures for Developing the Elements of, Ellsworth S. Obourn and Gaylord C. Montgomery, 72-80
- Reading Comprehension Difficulties in Science Materials, A Case Study of, Loren R. Luthi, 255-260
- Reading in General Science, An Experiment in the Use of Free, Cal McKnelly, 7-9
- Research in Science Education, Needed, A. N. Zechiel, 195-200
- Science and Higher Education in a Democracy, Men of, Otto Blüh, 299-307
- Science Is Fun When You Know How and Why, Ellen Hartnett, 149-152
- Science Sequence and Enrollments in Secondary Schools of the United States, George W. Hunter, 359-370
- Semantics for the Teacher of Science and Mathematics, Charles I. Glicksberg, 396-400
- Snakes, Mistakes About, G. E. S. Tordt, 135-137
- Survey Courses in Physical Science, The Training and Experience of Instructors in, Donald R. Watson, 80-84
- Survey Goals in the Physical Science, Morris Goran, 206-207
- Teachers, Status of Nebraska Science, Wayne Nicholls, 213-215
- Tenth-Grade Pupils, A Science Course, Grace Bagby, 13-16
- Textbooks of General Science, Some Data Pertinent to, Charles C. Graham, 35-41; 65-68
- Visual Materials in Elementary Science, The Use of, Mary E. Steel, 144-147
- Wholesomeness and Sanitation of Certain Food Products, The Use of Mold as the Means for Determining the, Jack R. Hollingsworth, 340-341
